☑ Mesh Panel ST 20

ST 20 panels from Troax are ideal for industrial applications in hazardous environments, the most common of which is conveyor guarding. ST 20 panels have a standard mesh aperture of 20x100mm, which allows for a safety distance of 120mm. The horizontal wire is placed on the inside of the panel to enhance protection, as it makes climbing the panel virtually impossible. This design also facilitates excellent visibility through the mesh panel. Despite its lighter weight advantage over the ST 30 panel, the ST 20 panel is a documented safety solution for a wide range of industrial purposes.

FACTS

Art no	Width (mm)	Height (mm)	Weight (kg)
39020001	200	1200	2.1
39030001	300	1200	2.56
39070001	700	1200	4.9
